PART 5: MAINTENANCE

MODENA cooker hood specifically designed for long term use so that it does not require complicated maintenance. However, there are some things that are recommended to take care of your cooker hood so that the quality is maintained. Turn off the unit and unplug the power cord from the power source before cleaning.

Regular care

Use a soft cloth dampened with a mixture of warm water and mild soap or household detergent. Do not use metallic pads, chemicals, abrasive materials or a stiff brush to clean the unit.

Maintenance for Grease Filter

Cleaning the filter can prevent the risk of fire.

Filter captures grease, smoke and dust that filters directly affect the efficiency of the cooker hood. If it is not cleaned, the residual grease (potentially flammable) will accumulate in the filter.

Maintenance for Carbon Filter

Attach a carbon filter on the unit to be used with a recirculation system (not the ducting system). This filter should be replaced at least every three months or depends on how often the use of cooker hood
